

Grade 1 News

October

Reading

This month we will work Five Finger Retell. Students will learn to retell a story by discussing the characters, setting, problem, solution and the events of a story.

Writing

This month in writing, we plan on working on mechanics. We want to make sure that all the students know what a sentence is and how to write one. It is important for them to know that all sentences start with a capital and end with a period and have finger spaces.

Math

Grade 1 will continue working in Module 1. We are finding different ways to add numbers together. We are also working on balanced equations. It would be great to practice your math facts at home with your child. Each week we will have a math fluency practice.

Science and Social Studies

We began our unit on Living and Non-living things. Once we learn the difference between living and non-living things, we will focus on bats and spiders.
