

**Coffee With the Principal
For Parents/Guardians in Grades 2-5**

**Topic: Spatial-Temporal (ST)Math
Come Meet JiJi !**

Please join Daniela Murphy, Silver Hill Math Coach/Interventionist, and Dan Rosson, our STMath representative, to learn about our new on-line math program. Created by MIND Research Institute, ST Math is game-based instructional software for K-12 designed to boost math comprehension and proficiency through visual learning. In combination with our EngageNY classroom instruction, the software games help students make connections between the visual representations from ST Math and symbolic representations found in their core instruction.

Thanks to grant funding, this year STMath is being used in grades 2-5. The program will be implemented in grades K-5 in 2017-2018. Dan has a full session prepared, so for this session we ask that only parents/guardians attend so we have time to cover all of his informational topics.

Sorry, there is no babysitting available.
